

***Staphylococcus aureus* :** **from basic science to clinical applications**

A University symposium
5 October 2012 (14h-17h30)
UCL- Woluwé - auditoire Maisin
avenue Mounier 51 - 1200 Bruxelles

14h: Basic science

- **Small Colony Variants: a challenge for the researcher, the microbiologist, and the clinician**
Prof. B. Kahl, Institute of Medical Microbiology, University of Münster, Münster, Germany
- **Biofilms: understanding physiology for developing therapeutic strategies**
Dr M. Shahrooei & Prof. J. Van Eldere, Laboratory of Clinical Bacteriology and Mycology, KULeuven
- **Infection models for the study of antibiotic PK/PD towards *S. aureus***
Prof. N. Fridmodt-Møller, Department of Microbiology, Hvidovre Hospital, Copenhagen, Denmark

COFFEE BREAK

15h45: Clinical applications

- **Resistance: an update on Belgian and European data**
Prof. O. Denis, Laboratoire de Référence MRSA-Staphylocoque, ULB
- **How to vanquish *S. aureus* in 2012**
Prof. S. Vandecasteele, Nephrology and Infectious diseases, AZ St Jan, Brugge
- **Treating *S. aureus* infections: from guideline to practice**
Dr F. Fripiat, Internal Medicine, CHU Sart Tilman, Liège
- **Therapeutic options: what's new in the pipeline ?**
Prof. P. Tulkens, Pharmacologie cellulaire et moléculaire, UCL
