Intracellular killing of bacteria by host cell defense mechanisms

Carryn et al, Infect Dis Clin North Am. (2003) 17:615-34

Some bacteria can escape host cell defense mechanisms

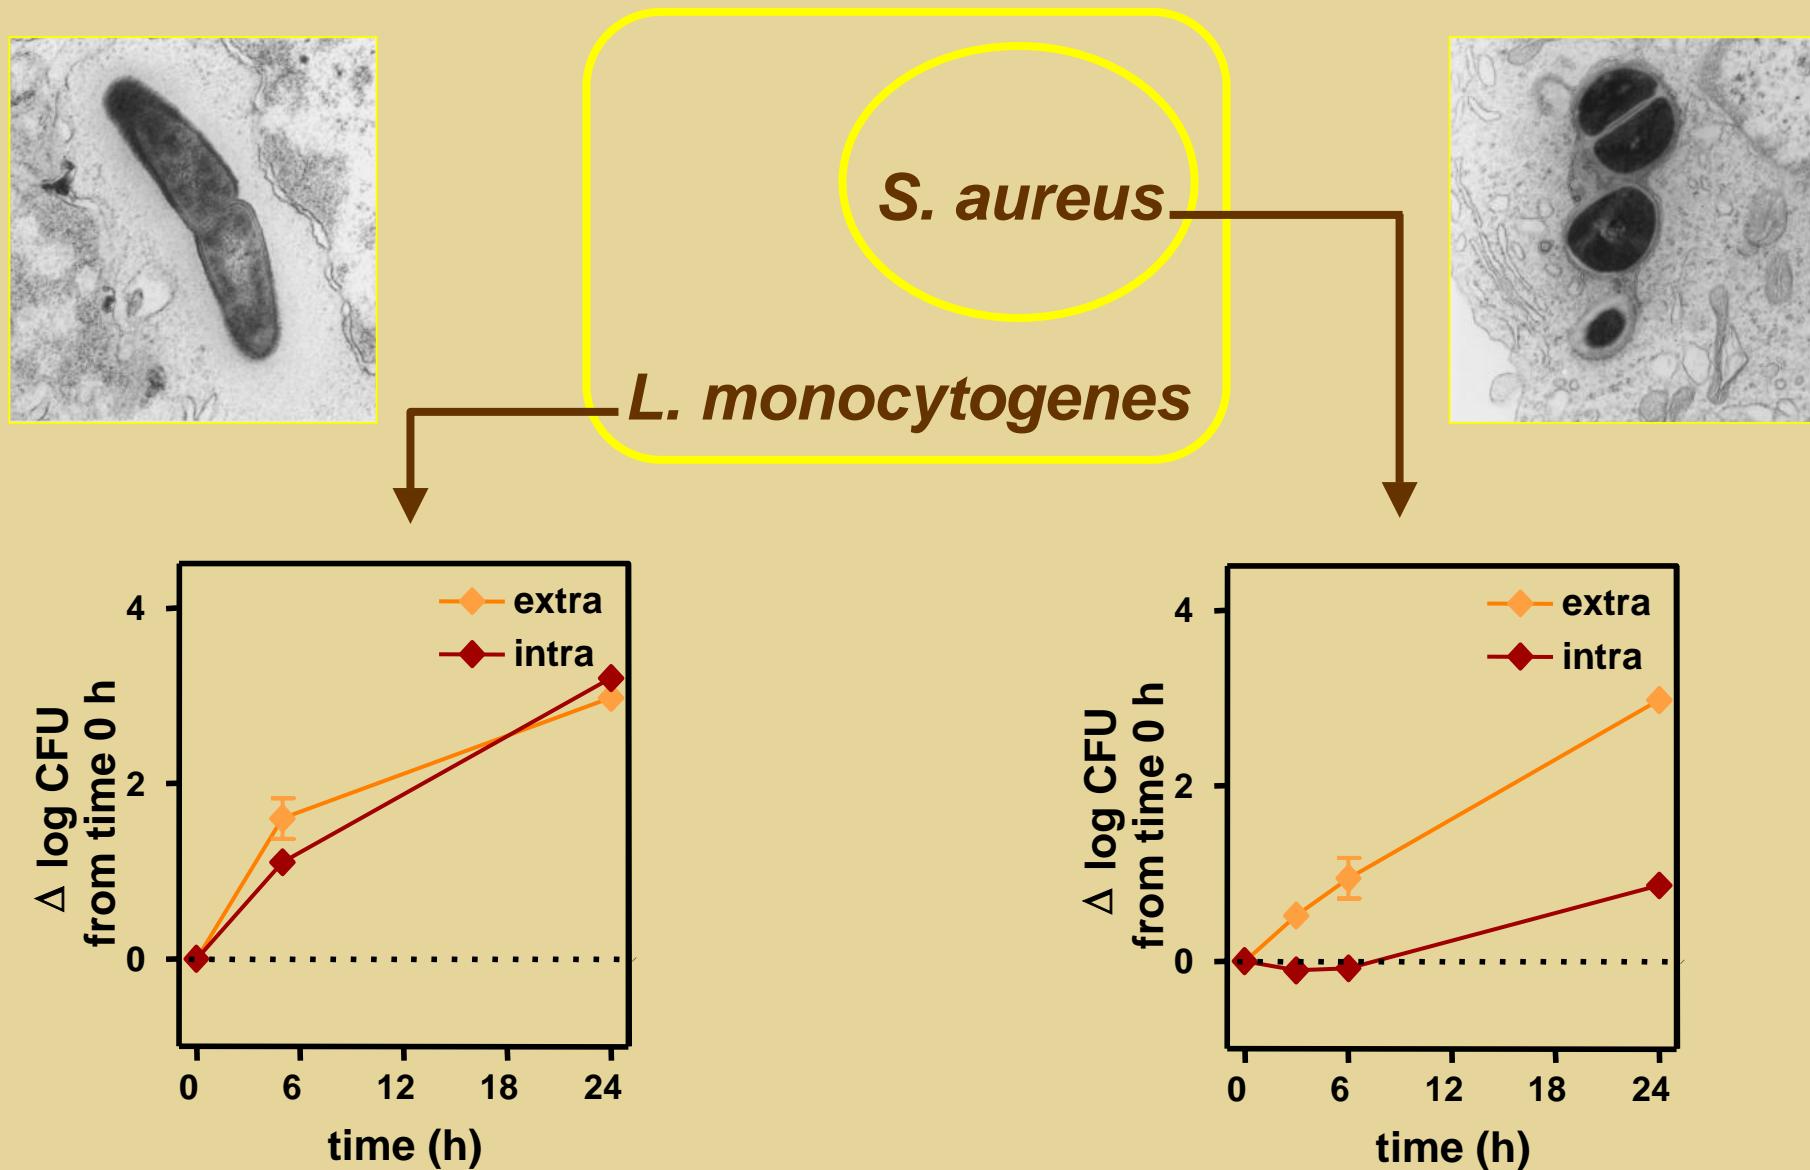

Carryn et al, Infect Dis Clin North Am. (2003) 17:615-34

Setting – up models of intracellular infections

	<i>L. monocytogenes</i>	<i>S. aureus</i>
infection of THP-1 macrophages and phagocytosis	decomplemented serum; 5 bact./cell	serum-opsonized; 4 bact./cell
elimination of extracellular bacteria	washing	washing 1 h with GEN 50 mg/L
incubation for 24 h • control: + GEN (1 X MIC) • antibiotic	1.0 mg/L Cmax	0.5 mg/L Cmax

Setting – up models of intracellular infections

Testing antibiotics : azithromycin

cellular
accumulation:
38 X

AZM

S. aureus

AZM

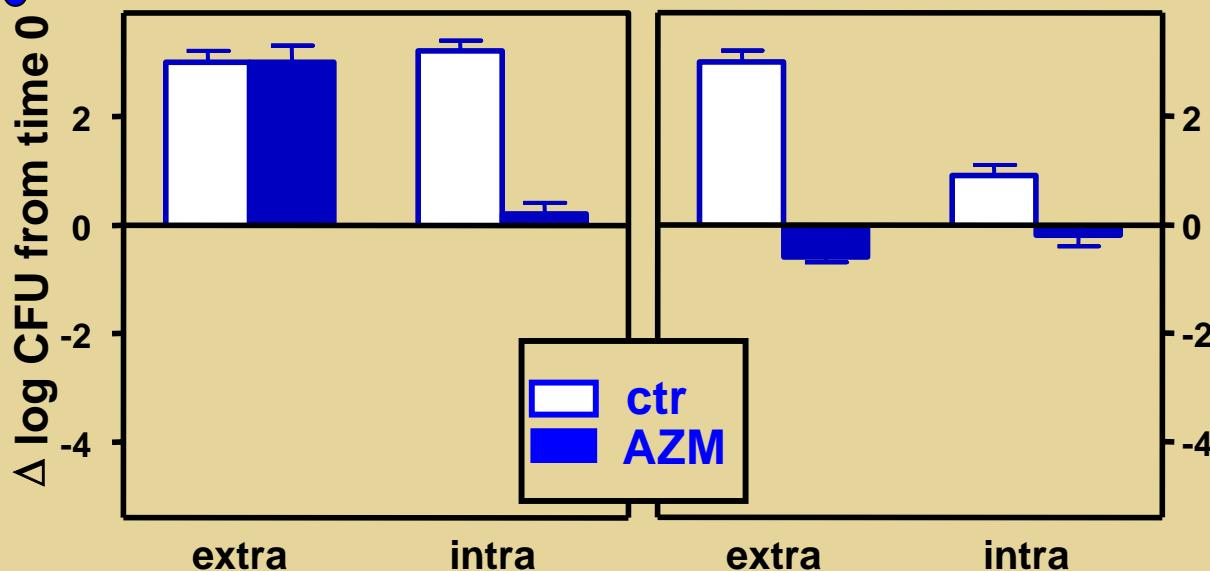

L. monocytogenes

C_{max}: 0.4 mg/L

MIC *L.m.*: 0.5 mg/L

MIC *S.a.*: 0.5 mg/L

poorly active extra- and intra-cellularly !

Testing antibiotics : gentamicin

cellular
accumulation:
4.4 X

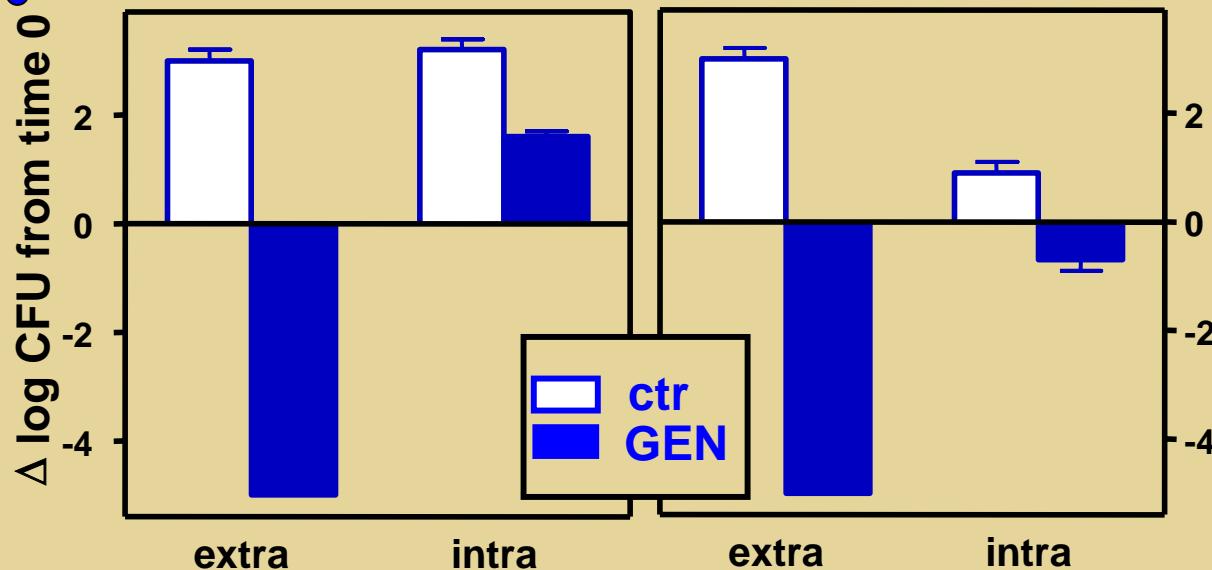

GEN
S. aureus

Cmax: 18 mg/L

MIC *L.m.*: 1.0 mg/L
MIC *S.a.*: 0.5 mg/L

L. monocytogenes

highly active extra; static intra-cellularly !

Testing antibiotics : moxifloxacin

cellular
accumulation:
7.6 X

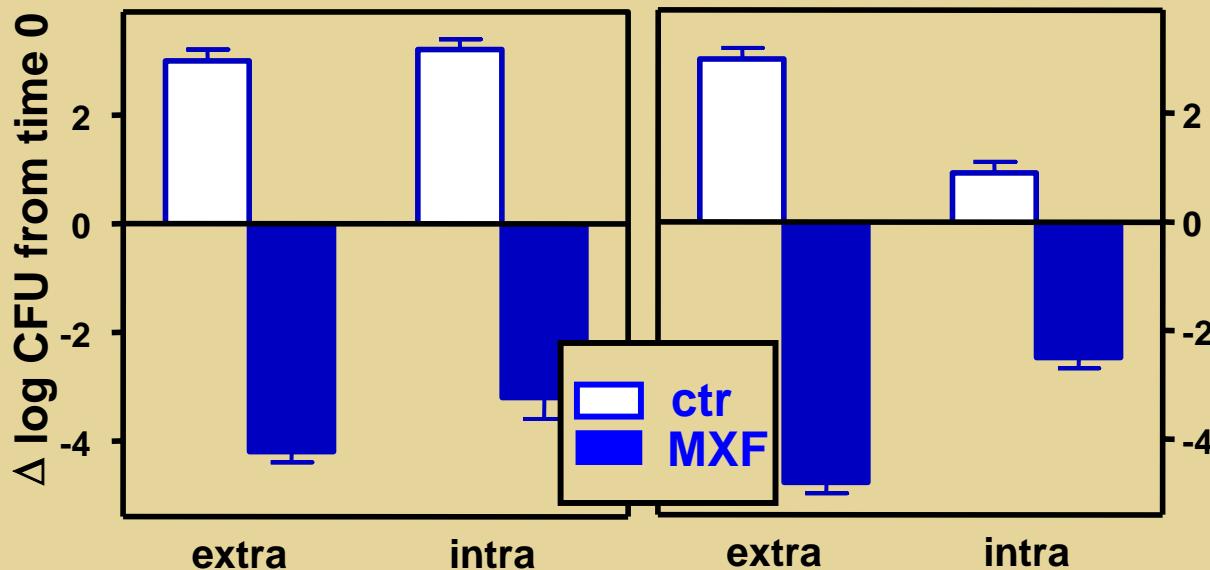

MXF
S. aureus

L. monocytogenes

Cmax: 4 mg/L

MIC *L.m.*: 0.5 mg/L
MIC *S.a.*: 0.06 mg/L

somewhat more active extra- than intra-cellularly !

Testing antibiotics : ampicillin

cellular
accumulation:
1 X

AMP
S. aureus

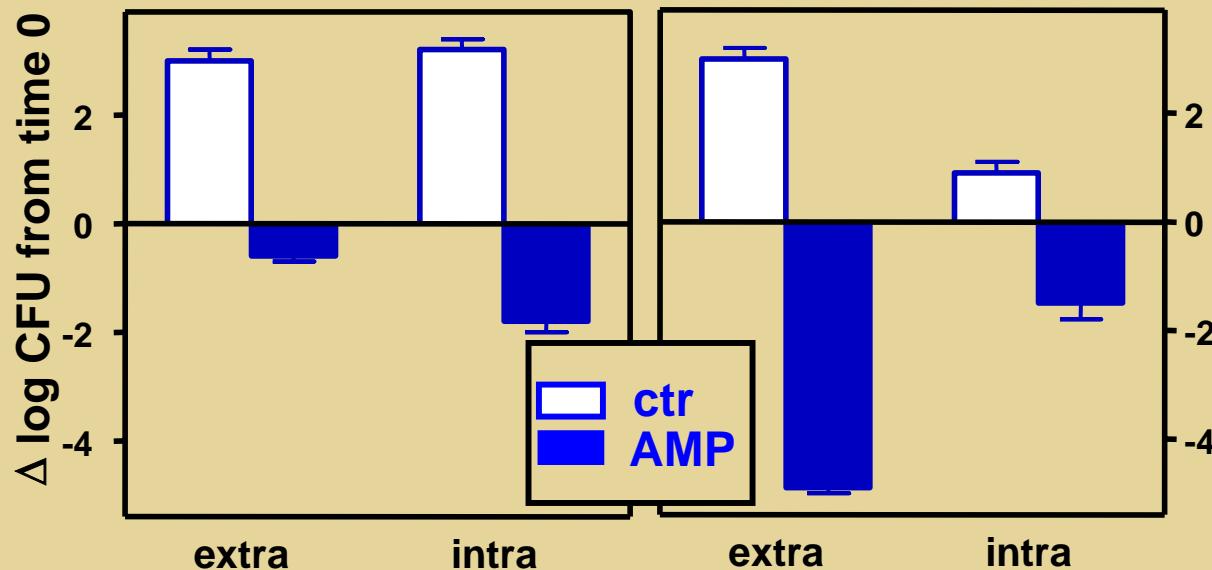

L. monocytogenes

Cmax: 50 mg/L

MIC *L.m.*: 1 mg/L

MIC *S.a.*: 0.06 mg/L

more active intra- than extra-cellularly against *L.m.* !

Intracellular activity of antibiotics: what have we learned ?

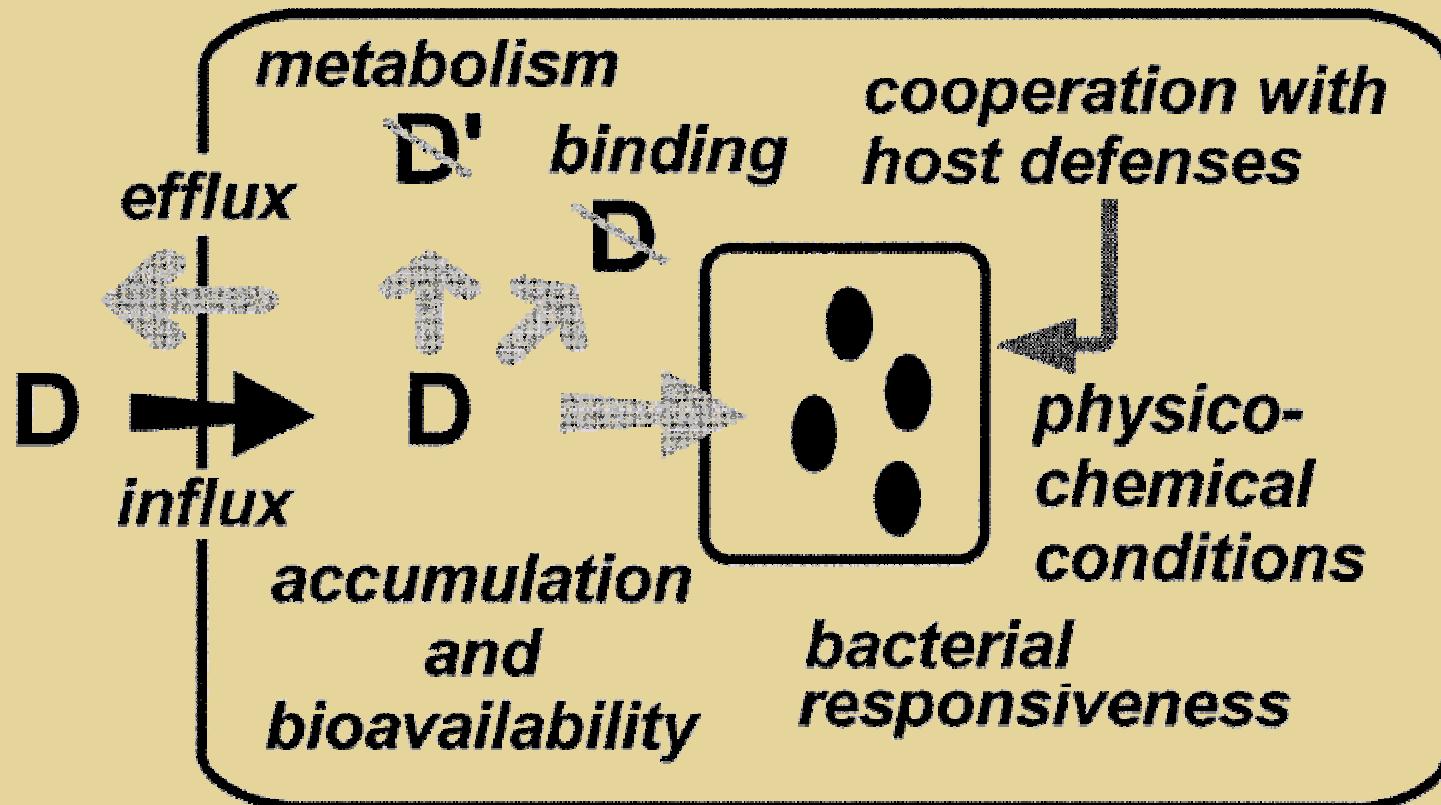

- intracellular activity variable according to the localization
 - of the bacteria
 - of the antibiotic
- intracellular activity most often lower than extracellular activity
(exception : ampicillin and *L. monocytogenes*)
- intracellular activity not predictable on the basis of
 - MIC
 - accumulation

appropriate models are needed !

Why these discrepancies ?

Intracellular PK/PD parameters
should be taken into account

Take home message ...

1. identify your target
2. choose the right weapon

you may avoid serious problems ...
